REFERENCES

" In terms of performance, Pau is unparalleled. His work is always of the highest quality and the successful outcome of any project is his pride and his priority. His technical skills are very strong and diverse as demonstrated by his ability to succeed in a variety of digital technologies including websites (responsive, mobile or otherwise), development and consumption of web services, emails, ad units and a small host of proprietary technologies such as the Veeva platform that he learned and mastered. Pau is a fluent communicator who is able to work with different teams from different backgrounds and disciplines easily. "

Drew Ashby (Technology Director, Klick Health) / dashby@klick.com

" Pau was a valuable asset to Klick Health and rapidly gained a reputation as an individual who could quickly grasp new projects and new frameworks producing quality websites and other digital assets often quicker than was expected. Pau's organization skills combined with his ability to understand all aspects of the project at hand meant that during the production phase, multiple departments knew they could rely on his expertise and judgement. In that regard, Pau was a key to the success of the endeavor. "

Mark Donaldson (Sr. Web Developer, Klick Health) / mdonaldson@klick.com

" Pau excels as both a member of a development team, and taking initiative himself, and has demonstrated both multiple times. He will do what is necessary to drive a project to completion, and is not afraid to identify areas where better process or improved or altered practice would better serve his colleagues, clients or employer. "

Simon Withers (Vice President, Technology, Klick Health) / swithers@klick.com
